

Environmental Policy

Whytelight Solutions Ltd survey, specify and install high quality, energy efficient LED lighting and Infrared heating solutions for commercial, retail and industrial businesses across the UK. The Company recognises its responsibility to minimise the impact of its business activities on the environment; and will continue to work with employees, clients, suppliers, contractors and neighbours to reduce our environmental impact.

The Company is committed to protect the environment through our pledge to:

- Minimise waste by regularly evaluating business operations.
- Minimise environmental impact through responsible selection, production and transportation of raw materials and products.
- Reduce toxic emissions through environmentally responsible fleet selection and efficient use.
- Reduce pollution and environmental impact through efficient route and appointment scheduling.
- Minimise energy consumption through efficient resource allocation.
- Actively promote recycling both internally and amongst our customers and suppliers.
- Ensure compliance with all current environmental legislation that relates to the business activities of the Company.
- Actively engage all company employees to support this Environmental Policy.

The Company Directors will monitor compliance with the commitments made; and will review and update this Environmental Policy annually and following any changes in regulations. The Environmental Policy will be published on the Company website.
